🔧 PROJECTS

CARMA - Carbon & Air Research and Mitigation Analysis Python, Flask, Next.js

[Live Demo](#)

Built a full-stack web application with a Flask-based backend and a Next.js frontend. Designed RESTful APIs and integrated them with a responsive UI for policy impact simulations.

Analytical Archive - CGE Policy Simulation Platform React, Python

[Live Demo](#)

Engineered a CGE simulation pipeline modeling macro and persona-level impacts. Built a causal graph engine and optimized simulations (<40ms) with automated insights.

Helix - Lab Intelligence System React, TypeScript, FastAPI, PostgreSQL

[Live Demo](#)

Designed a full-stack AI system with a RAG pipeline over 2.4M+ papers for protocol generation. Built an interactive UI for real-time refinement and predictive anomaly detection.
